The Grundfos JP is a self-priming, single-stage centrifugal jet pump ideal for transferring water from wells or ground tanks.

It has an excellent suction capacity and is designed for long, trouble-free operation. The built-in ejector with guide vanes ensures optimum self-priming properties. JP is small and compact with a lifting handle that makes the pump handy and easy to carry.

APPLICATIONS

- Water transfers from tanks below and above the ground level
- For treated water transfer

FEATURES

Self-priming

With a suction-lift of up to 8 metres, this pump is ideal to transfer water from a well or ground tanks. This enables the JP to serve a large variety of installations

Robust design

The materials of the pump are lightweight and ensure excellent corrosion resistance

Thermal overload protection

JP is effectively protected against any accidental overload by built-in thermal and current protection. This means that no additional motor protection is required
